Skills

- Javascript
- Typescript
- React
- Redux
- Next.js
- Node.js
- MongoDB
- Prisma
- Tailwind
- Git

Languages

- Italian
- English

Davide Avagnano

Software Developer

About me

Software Developer specialized in front-end development with React and TypeScript, with experience in Next.js as a full-stack framework. Skilled in using Tailwind CSS to create modern and efficient designs. I focus on building scalable, high-impact applications with a strong emphasis on performance and user experience.

Projects

Portfolio Website - (Dec 2024)

Built a portfolio app to showcase projects and skills, optimized with smooth animations and high performance (98/100 Lighthouse). Includes a contact form and responsive design.

- Next.js, TypeScript, Tailwind CSS, Framer Motion

Authentication App - (Nov 2024)

Developed a secure authentication system with login/logout functionality, password reset, and two-factor email verification. Implemented a user-friendly interface

- Next.js, TypeScript, NextAuth.js v5, Prisma, PostgreSQL

Weather Forecast App - (May 2024)

Designed and developed a weather application providing real-time forecasts for multiple cities using OpenWeather API, showcasing skills in API integration

- React, TypeScript, Tailwind CSS, REST API

Meditation App - (Apr 2024)

Created an interactive meditation app featuring customizable countdown timers, a carousel for reviews, and a structured FAQ section. Implemented a global state management system for seamless functionality across all pages.

- React, TypeScript, Tailwind CSS, Shadcn/ui

Education

- **Bachelor's Degree in Aerospace Engineering**

2017 - 2020 | University of Naples Federico II
GPA: 3.8
