Skills

- Javascript
- Typescript
- React
- Redux
- Next.js
- Tailwind
- Node.js
- Express
- MongoDB
- PostgreSQL
- Docker
- Git

Languages

- Italian
- English

Davide Avagnano

Software Engineer

About me

Full Stack Developer with experience in front-end development using React, Redux, and Next.js, and back-end development with Node.js and Express. I use Tailwind CSS to create modern and performant designs. Specialized in scalable, high-impact applications optimized for performance and user experience, with advanced knowledge of MongoDB and PostgreSQL.

Experience

Nasa API Manager - (Jan 2025)

API service for managing space launches: integrates SpaceX data, supports advanced CRUD operations, and organizes historical data. Structured with MVC protocol for scalability and maintainability.

- React, Node.js, Express, Typescript, MongoDB, Mongoose, Postman

Inventory Managment Dashboard - (Dec 2024)

Dashboard for inventory management, with dynamic charts and optimized CRUD operations. Designed for scalability and performance, fully deployed on AWS with high reliability.

- Next.js, Redux Toolkit, Node.js, Express, PostgreSQL, Prisma, AWS

Portfolio Website - (Dec 2024)

Built a portfolio app to showcase projects and skills, optimized with smooth animations and high performance (98/100 Lighthouse). Includes a contact form and responsive design.

- Next.js, TypeScript, Tailwind CSS, Framer Motion

Authentication App - (Nov 2024)

Developed a secure authentication system with login/logout functionality, password reset, and two-factor email verification. Implemented a user-friendly interface

- Next.js, TypeScript, NextAuth.js v5, Prisma, PostgreSQL

Education

- **Bachelor's Degree in Aerospace Engineering**

2017 - 2020 | University of Naples Federico II
GPA: 3.8

- **Web Development Course**

2022 - 2024 | Start2Impact University

- **Blockchain Technology & Management**

2021 - 2022 | Ateneo Impresa
